

Amberlite – Like stone, but better...

Amberlite is a man-made material with the appearance of real natural stone but with far greater design flexibility than stone.

Amberlite can be formed to even the most complex of designs and is an affordable way to enhance or transform any space.

- From 6mm thick with other thicknesses available.
- Large 2440 x 1220 and 3000 x 1200 panel sizes.
- Cut-to-size and fabrication service available.
- Can be curved and/or shaped to almost any design.
- Translucency as standard.
- A wide range of styles to select from.
- Installation service.
- Standard honed or polished finish.
- UV applied non-porous, food-safe, scratch resistant finish.

Any design

Any shape

Any texture
